

Didn't spread potash last fall?
Think you can do it before planting corn this spring?

LIQUID says: ***"Why bother?"***

Research shows that spring-applied broadcast potash doesn't help that year's corn.

Why not go with the *Sure-K*™ option?
Planter-applied liquid potassium nutrition that can *replace* potash.

* **Planter fertilizer:** 5 gal/A *Sure-K*™ +
3 gal/A *Pro-Germinator*™ + 2 qt/A *Micro 500*™
