

WA Potatoes yield and size better with ACLF Fertilizer

Three Year Average Shows Consistent Improvement

2008-2010 Pasco, WA

Grower Standard for WA Trials, apply 10-34-0 at 35 GPA with the planter. Conv. w/ Pro-Germinator = 13.5 GPA Pro-Germinator at planting (leaving room for Sure-K & Micro-500), the rest of the program unchanged. Conv. w/ Sure-K = Sure-K at 12 GPA & eNhanse @ 4.1 GPA to replace the entire amount of Sulfate of Potash used with the conventional program. All other inputs identical for these treatments. See ACLF's Annual research reports for additional descriptions and details at agroliquid.com
