

## Quick Release, Readily Available Phosphorus

### springuP™

Starter liquid phosphorus solution for strong early-season performance because of its fast-release P and easy application in-furrow.

#### A Strong Start

It's important to get a crop off to a strong start to set the stage for a successful season. SpringuP™ is an easy-to-apply, fast-release formulation that will produce results quickly. The ability to apply springuP in-furrow makes the nutrients readily available to get the crop out of the ground quickly and evenly.

Early season soils tend to be cold, and nutrients may not be as readily available. This can slow root growth. SpringuP helps overcome these challenges, as it is specifically designed for in-furrow placement to get those young plants out of the soil, where they will benefit from added warmth and light. Partnering springuP with Pro-Germinator® provides outstanding, season-long phosphorus when and where the crop needs it.

#### Product Benefits

- ✓ Stimulates early growth
- ✓ Can be applied in-furrow or with planter placement
- ✓ Low risk of seed or seedling injury
- ✓ Can be applied with other nutrients or crop protection products

### Technical Data

Weight Per Gallon (lb/gal, 68°F): 9.66–9.86  
 Specific Gravity: 1.158–1.181  
 pH Range (68°F): 6.0–6.4  
 Freezing Point (°F): 20

### Directions for Use

The quality and composition of springuP allows placement directly into the root zone with little risk of tissue damage, giving springuP greater efficacy and more application flexibility.

SpringuP can be applied:

- With versatile planter placement options
- Banded over the top of the seed zone
- Through fertigation
- With crop protection products

## Composition Guaranteed Analysis

### Total Nitrogen (N)

**4.00%**

2.50% Ammoniacal Nitrogen  
 1.50% Urea Nitrogen

### Phosphate (P<sub>2</sub>O<sub>5</sub>)

**15.00%**

### Potash (K<sub>2</sub>O)

**3.00%**
