

Melons like cantaloupe are Better with Liquid™

Over the last five years, AgroLiquid fertility programs have produced higher melon yields by enhancing fruit uniformity and fruit set. Sweeter melons with greater soluble solids means they taste good too.

Start them right, then feed them well all season with AgroLiquid balanced fertility, enjoy.

Better Yields with greater harvest uniformity
AgroLiquid Products produce sweeter melons

Five Year Average

Applications for 2013 trial, rates for prior years were similar, but based on soil test for each plot location
Conventional = 315# potash, 46 gal 28% UAN & 15.5 gal 10-34-0, 5# Ironite Micro-nutrients
AgroLiquid = 33 gal High NRG-N, 16 gal. Sure-K, 5.5 gal Pro-Germinator, 1 gal Micro 500, 1 qt. Micro link Mn
See 2013 and prior research reports for more detailed information
