DIRECTIONS FOR USE

eNhance™ offers several distinct usage opportunities:

- combined with nitrogen solutions to provide increased nitrogen usability
- combined with a liquid fertilizer program as a sulfur source
- in-furrow as a sulfur source
- as a foliar treatment

eNhance is primarily a nitrogen supplement to improve the efficiency of liquid UAN fertilizers. Add two gallons per ton of 28% UAN, or 2.25 gallons per ton of 30% or 32% UAN solution.

USE RATE SUMMARY TABLE

At Planting Application Rates

Directions For Use General Guideline:

For proper agronomic application rates suitable for your geographical area or the maximum allowable non-nutrient application rate per acre, consult a trained soil specialist at AgroLiquid or call or write to AgroLiquid with the address provided.

eNhance™ is a nutritional supplement that combines Flavonol Polymer Technology with the proper micronutrients and enzymes to produce greater nitrogen utilization. Using eNhance as part of a nitrogen-management program may allow conventional nitrogen solutions to be applied at reduced rates while still maintaining optimal yield potential. By working within the plant, eNhance nutritionally fortifies the crop to use nitrogen more efficiently. In addition to reducing applied nitrogen rate, eNhance is an excellent source of crop-available sulfur.
