

2023 Micro 500 win rate trial

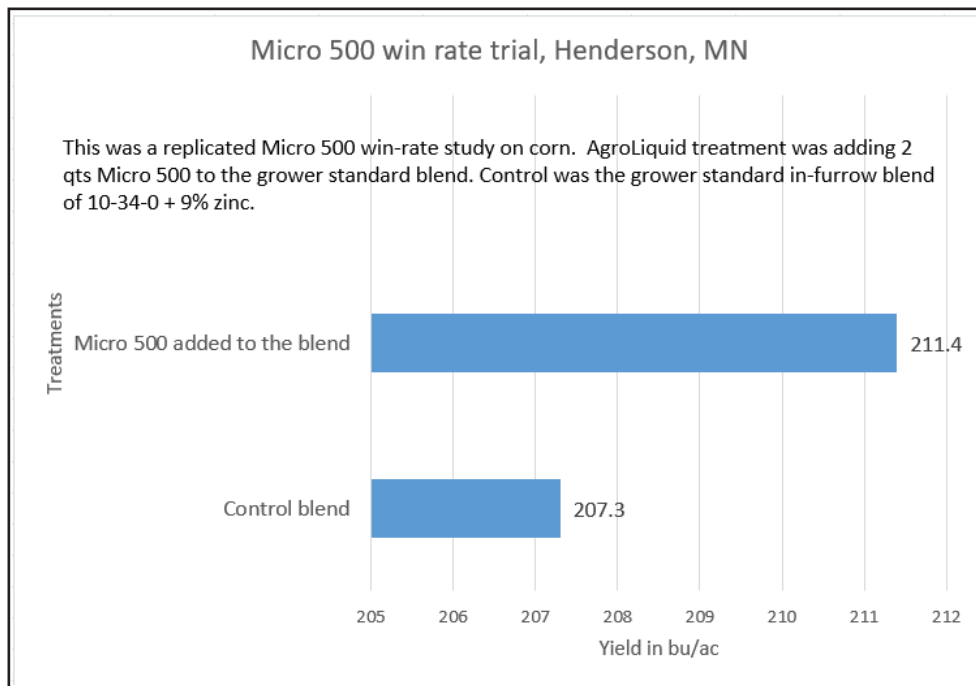

Bates Seeds: Henderson, MN

Experiment Info	
Planted:	5/12/23
Harvested:	
Yield Goal:	
Variety:	DKC 50-86
Pop.:	36,000
Row Width:	30
Prev. Crop:	Soy
Plot Size:	
Reps:	

Objective:

AgroLiquid's Micro 500 has an excellent win-rate history. This history provides an opportunity for Retail Partners to use Micro 500 as an introductory AgroLiquid product for growers who may be reluctant to switch to AgroLiquid from their current in-furrow competitor blend. This field strip trial was conducted for that purpose.

Conclusions:

Simply adding 2 quarts of Micro 500 to this grower's blend of 4.5 gal 10-34-0 + 1 qt 9% chelated zinc resulted in a yield response sufficient to generate a positive ROI.
