

MONTY'S DRI-CARBON™

CONTAINS BENEFICIAL SUBSTANCES

ACTIVE INGREDIENTS:

Humic Acids (*Derived from Oxidized Lignite*) -- 47.00%

OTHER INGREDIENTS:

Lignite Coal ----- 53.00%

PRODUCT DESCRIPTION

Monty's Dri-Carbon may aid in the uptake of micronutrients.

DIRECTIONS FOR USE

Dri-Carbon can be applied in fall or spring. For best results, product should be applied in the fall, following harvest, and may be blended or applied with dry products. Alternately, Dri-Carbon may be applied in the spring with dry products. Apply 10-125 lb/A.

For proper agronomic application rates suitable for your geographical area or the maximum allowable non-nutrient application rate per acre, consult a trained soil specialist at AgroLiquid or call or write to AgroLiquid with the address provided.

- Monty's Dri-Carbon may not be applied near water, storm drains or drainage ditches.
- Monty's Dri-Carbon may not be applied if heavy rain is expected.
- Monty's Dri-Carbon may only be applied to the intended application site.

Technical Data

Net Content: 50 lbs

pH at 68° F ----- 9.2 - 11.5

NOTE: Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>

STORAGE AND HANDLING INSTRUCTIONS

Store Dri-Carbon in a dry place. During periods of high humidity, take precautions such as the addition of a drying agent during mixing or application to prevent clumping. Do not mix with other products which contain high levels of moisture. Do not mix or apply while raining. Prior to application, do not expose product to rain. Failure to follow these precautions may cause clumping or cause Dri-Carbon to adhere to spreading equipment. Refer to SDS for other safety and handling information.
