## Objective:

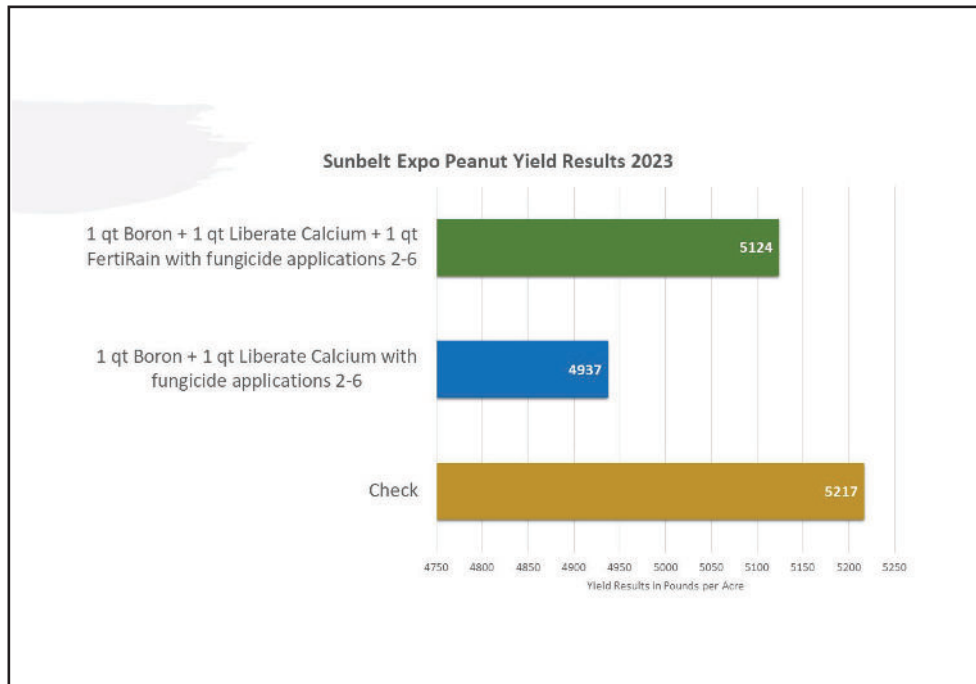

Two AgroLiquid foliar combinations were made to be applied with fungicide applications throughout the season.

Treatment 1 - 1 qt/A Boron + 1 qt/A LiberateCa.

Treatment 2 - 1 qt /A Boron + 1 qt/A LiberateCa + 1 qt/A fertiRain

Yield results appear below.

## Conclusions:

- The foliar application with fertiRain did yield higher than without, however neither treatment out-yielded the no foliar check.
