

Kalibrate™

Precision Potassium

- Kalibrate combines the proven performance of AgroLiquid potassium with sulfur.
- Late applied potassium helps with stalk-strength and water usability during peak temperatures and water usage.
- Low use rate, ease of application, with high return on investment.
- Mixes with UAN and many other fertilizers.
- Response on high potassium soils.

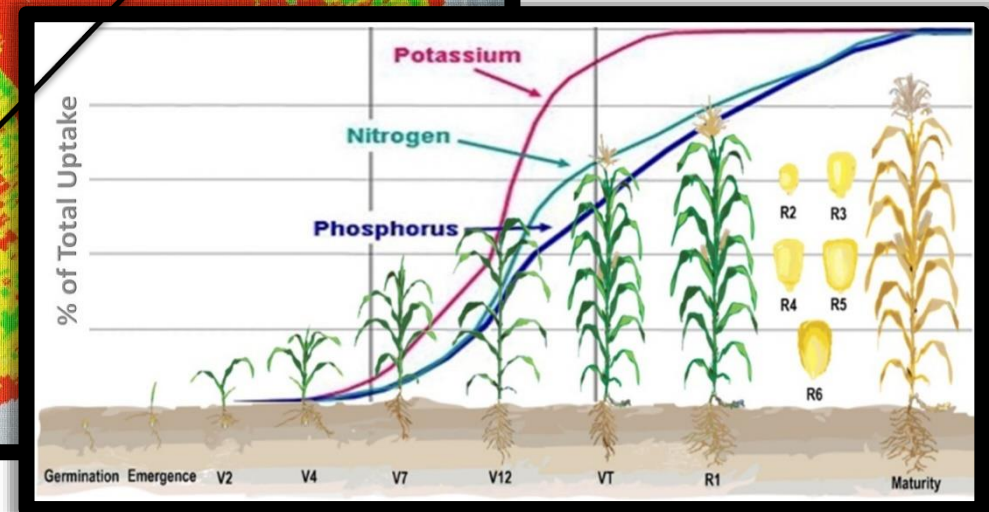

Treated half of a pivot with 2 gallon of Kalibrate, pivot injected at VT

Non-treated
