

Pro-Germinator (2x2)

Pro-Germinator 2x2 Study | Hopkinsville Research Farm

We typically apply Pro-Germinator in-furrow in our liquid fertility program. That's our preferred method. However some growers choose to apply it in a 2x2, or are hesitant to invest in Pro-Germinator in their 2x2 application. We did a 2x2 trial with Pro-Germinator to see different use cases and found good performance in a 2x2.
